Project Name	Smart Farmer-IOT Enabled Smart Farming Application
Maximum marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

1. Find the best tech solution to solve existing business problems

2. Describe the structure, characteristics, behaviour , and other aspects of the software to project stakeholders.

3. Define features, development phases, and solution requirements.

4. Provide specifications according to which the solution is defined, managed, and delivered.
